

# Elevarq Signals – End User License Agreement

This End User License Agreement ("Agreement") governs your use of **Elevarq Signals (the "Software"), made available by** Scantr LLC, doing business as Elevarq ("Elevarq"), through AWS Marketplace.

- 1. License.** The Software is licensed, not sold, under the **BSD 3-Clause License**, the full text of which is included with the Software and available at <https://github.com/Elevarq/Signals/blob/main/LICENSE>. By subscribing to or using the Software, you agree to the terms of that license, which govern your rights to use, copy, modify, and redistribute the Software.
- 2. No software fee.** The Software is offered at no software charge through AWS Marketplace. You remain responsible for the AWS infrastructure and service charges you incur while running the Software (for example, Amazon EKS, Amazon EC2, Amazon EBS storage, Amazon RDS or Aurora, and — where you use them — AWS Secrets Manager, AWS Systems Manager Parameter Store, and AWS KMS). The AWS Marketplace terms also apply to your subscription.
- 3. Data.** The Software is local-first and read-only: as packaged, it sends **no telemetry and no diagnostic data to Elevarq**. The diagnostic snapshots it collects remain within your own AWS account and customer-controlled infrastructure; the Software exports data only to the local destination you explicitly choose. The Software's outbound network calls are limited to the PostgreSQL targets you configure and the optional cloud-authentication, secret-store, and TLS-related requests you configure (for example, Amazon RDS IAM authentication, AWS Secrets Manager, or AWS Systems Manager Parameter Store), which are made to your own cloud services and never to Elevarq. Any data associated with your AWS Marketplace subscription, Amazon ECR access, or AWS account (for example, subscription and entitlement records) is handled by AWS under the applicable AWS Marketplace and AWS service terms; it is not collected by the Software, which sends no telemetry to Elevarq.
- 4. No warranty.** THE SOFTWARE IS PROVIDED "AS IS", WITHOUT WARRANTY OF ANY

KIND, EXPRESS OR IMPLIED, INCLUDING BUT NOT LIMITED TO THE WARRANTIES OF MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE, AND NONINFRINGEMENT, as set out in the BSD 3-Clause License.

5. **Limitation of liability.** To the maximum extent permitted by law, in no event shall Elevarq be liable for any claim, damages, or other liability arising from or in connection with the Software or its use, as set out in the BSD 3-Clause License.

6. **Support.** Community support is provided through GitHub Issues at <https://github.com/Elevarq/Signals>. Security vulnerabilities should be reported as described in Section 7.

7. **Security.** Vulnerability reporting and the supported-version policy are described at <https://github.com/Elevarq/Signals/blob/main/SECURITY.md> (security contact: [security@elevarq.com](mailto:security@elevarq.com)).

In the event of any conflict between this Agreement and the BSD 3-Clause License with respect to the license grant, warranty, and liability, the BSD 3-Clause License controls.
