

LEGAL NOTICE FOR MEDIA ACCELERATION VIDEO SDK V3 AMAZON MACHINE INSTANCE – AL2 V3.0

CONTAINED WITHIN THIS MEDIA ACCELERATION VIDEO SDK V3 AMAZON MACHINE INSTANCE – AL2 V3.0 PRODUCT IS A COLLECTION OF SOFTWARE (“SOFTWARE”) THAT IS COPYRIGHTED BY XILINX AND THIRD PARTIES AND THAT IS SUBJECT TO VARIOUS LICENSE AGREEMENTS THAT ARE SET FORTH BELOW. WITH RESPECT TO SOFTWARE COPYRIGHTED BY THIRD PARTIES, XILINX DOES NOT GRANT TO YOU ANY RIGHTS OR LICENSES TO SUCH THIRD PARTY SOFTWARE. YOU AGREE TO CAREFULLY REVIEW AND ABIDE BY THE TERMS AND CONDITIONS OF ALL LICENSE AGREEMENTS PRINTED BELOW.

WITH RESPECT TO ANY LICENSE THAT REQUIRES XILINX TO MAKE AVAILABLE TO RECIPIENTS OF OBJECT CODE DISTRIBUTED BY XILINX PURSUANT TO SUCH LICENSE THE CORRESPONDING SOURCE CODE, AND IF YOU DESIRE TO RECEIVE SUCH SOURCE CODE FROM XILINX, PLEASE REFER TO THE XILINX WEBSITE AT [HTTPS://WWW.XILINX.COM/PRODUCTS/DESIGN-TOOLS/GUEST-RESOURCES.HTML](https://www.xilinx.com/products/design-tools/guest-resources.html). IF YOU CANNOT ACCESS THE INTERNET TO OBTAIN A COPY THEREOF, THEN XILINX HEREBY OFFERS (WHICH OFFER IS VALID FOR AS LONG AS REQUIRED BY THE APPLICABLE LICENSE; AND WE MAY CHARGE YOU THE COST THEREOF UNLESS PROHIBITED BY THE LICENSE) TO PROVIDE YOU WITH A COPY OF SUCH SOURCE CODE; AND TO ACCEPT SUCH OFFER SEND A LETTER REQUESTING SUCH SOURCE CODE (PLEASE BE SPECIFIC BY IDENTIFYING THE PARTICULAR XILINX SOFTWARE YOU ARE INQUIRING ABOUT (NAME AND VERSION NUMBER), TO: XILINX, INC., LEGAL DEPARTMENT, ATTENTION: SOFTWARE COMPLIANCE OFFICER, 2100 LOGIC DRIVE, SAN JOSE, CA U.S.A. 95124.

LIST OF SOFTWARE AND ASSOCIATED COPYRIGHTS AND LICENSE TERMS (EACH UNIQUE SOFTWARE IS PREFACED BY THE TERM “COMPONENT(S)”):

Components: Amazon Linux 2

License-

Amazon Linux is available under the GNU General Public License, version 2.0. Individual software packages are available under their own licenses; run `rpm -qi [package name]` or check `/usr/share/doc/[package name]-*` and `/usr/share/licenses/[package name]-*` for details.

As with all Docker images, these likely also contain other software which may be under other licenses (such as Bash, etc from the base distribution, along with any direct or indirect dependencies of the primary software being contained).

Some additional license information which was able to be auto-detected might be found in the repo-info repository's `amazonlinux/` directory.

As for any pre-built image usage, it is the image user's responsibility to ensure that any use of this image complies with any relevant licenses for all software contained within.

License

Most files in FFmpeg are under the GNU Lesser General Public License version 2.1 or later (LGPL v2.1+). Read the file `COPYING.LGPLv2.1` for details. Some other files have MIT/X11/BSD-style licenses. In combination the LGPL v2.1+ applies to FFmpeg.

Some optional parts of FFmpeg are licensed under the GNU General Public License version 2 or later (GPL v2+). See the file `COPYING.GPLv2` for details. None of

these parts are used by default, you have to explicitly pass `--enable-gpl` to configure to activate them. In this case, FFmpeg's license changes to GPL v2+.

Specifically, the GPL parts of FFmpeg are:

- libpostproc
- optional x86 optimization in the files
 - `libavcodec/x86/flac_dsp_gpl.asm`
 - `libavcodec/x86/idct_mmx.c`
 - `libavfilter/x86/vf_removegrain.asm`
- the following building and testing tools
 - `compat/solaris/make_sunver.pl`
 - `doc/t2h.pm`
 - `doc/txi2pod.pl`
 - `libswresample/tests/swresample.c`
 - `tests/checkasm/*`
 - `tests/tiny_ssim.c`
- the following filters in libavfilter:
 - `signature_lookup.c`
 - `vf_blackframe.c`
 - `vf_boxblur.c`
 - `vf_colormatrix.c`
 - `vf_cover_rect.c`
 - `vf_croptdetect.c`
 - `vf_delogo.c`
 - `vf_eq.c`
 - `vf_find_rect.c`
 - `vf_fspp.c`
 - `vf_histeq.c`

- `vf_hqdn3d.c`
- `vf_kerndeint.c`
- `vf_lensfun.c` (GPL version 3 or later)
- `vf_mcdeint.c`
- `vf_mpdecimate.c`
- `vf_nnedi.c`
- `vf_owdenoise.c`
- `vf_perspective.c`
- `vf_phase.c`
- `vf_pp.c`
- `vf_pp7.c`
- `vf_pullup.c`
- `vf_repeatfields.c`
- `vf_sab.c`
- `vf_signature.c`
- `vf_smartblur.c`
- `vf_spp.c`
- `vf_stereo3d.c`
- `vf_super2xsai.c`
- `vf_tinterlace.c`
- `vf_uspp.c`
- `vf_vaguedenoiser.c`
- `vsrc_mptestsrc.c`

Should you, for whatever reason, prefer to use version 3 of the (L)GPL, then the configure parameter `--enable-version3` will activate this licensing option for you. Read the file `COPYING.LGPLv3` or, if you have enabled GPL parts, `COPYING.GPLv3` to learn the exact legal terms that apply in this case.

There are a handful of files under other licensing terms, namely:

- * The files `libavcodec/jfdctfst.c`, `libavcodec/jfdctint_template.c` and `libavcodec/jrevdct.c` are taken from libjpeg, see the top of the files for licensing details. Specifically note that you must credit the IJG in the documentation accompanying your program if you only distribute executables. You must also indicate any changes including additions and deletions to those three files in the documentation.
- * `tests/reference.pnm` is under the expat license.

External libraries

FFmpeg can be combined with a number of external libraries, which sometimes affect the licensing of binaries resulting from the combination.

Compatible libraries

The following libraries are under GPL version 2:

- avisynth
- frei0r
- libcdio
- libdavs2
- librubberband
- libvidstab
- libx264
- libx265
- libxavs
- libxavs2

- libxvid

When combining them with FFmpeg, FFmpeg needs to be licensed as GPL as well by passing `--enable-gpl` to configure.

The following libraries are under LGPL version 3:

- gmp

- libaribb24

- liblensfun

When combining them with FFmpeg, use the configure option `--enable-version3` to upgrade FFmpeg to the LGPL v3.

The VMAF, mbedTLS, RK MPI, OpenCORE and VisualOn libraries are under the Apache License 2.0. That license is incompatible with the LGPL v2.1 and the GPL v2, but not with version 3 of those licenses. So to combine these libraries with FFmpeg, the license version needs to be upgraded by passing `--enable-version3` to configure.

The smbclient library is under the GPL v3, to combine it with FFmpeg, the options `--enable-gpl` and `--enable-version3` have to be passed to configure to upgrade FFmpeg to the GPL v3.

Incompatible libraries

There are certain libraries you can combine with FFmpeg whose licenses are not compatible with the GPL and/or the LGPL. If you wish to enable these libraries, even in circumstances that their license may be incompatible, pass `--enable-nonfree` to configure. This will cause the resulting binary to be unredistributable.

The Fraunhofer FDK AAC and OpenSSL libraries are under licenses which are incompatible with the GPLv2 and v3. To the best of our knowledge, they are compatible with the LGPL.

/*

* This file is part of the Independent JPEG Group's software.

*

* The authors make NO WARRANTY or representation, either express or implied,

* with respect to this software, its quality, accuracy, merchantability, or

* fitness for a particular purpose. This software is provided "AS IS", and

* you, its user, assume the entire risk as to its quality and accuracy.

*

* This software is copyright (C) 1994-1996, Thomas G. Lane.

* All Rights Reserved except as specified below.

*

* Permission is hereby granted to use, copy, modify, and distribute this

* software (or portions thereof) for any purpose, without fee, subject to

* these conditions:

* (1) If any part of the source code for this software is distributed, then

* this README file must be included, with this copyright and no-warranty

* notice unaltered; and any additions, deletions, or changes to the original

* files must be clearly indicated in accompanying documentation.

* (2) If only executable code is distributed, then the accompanying

* documentation must state that "this software is based in part on the work

* of the Independent JPEG Group".

- * (3) Permission for use of this software is granted only if the user accepts
- * full responsibility for any undesirable consequences; the authors accept
- * NO LIABILITY for damages of any kind.

*

- * These conditions apply to any software derived from or based on the IJG
- * code, not just to the unmodified library. If you use our work, you ought
- * to acknowledge us.

*

- * Permission is NOT granted for the use of any IJG author's name or company
- * name in advertising or publicity relating to this software or products
- * derived from it. This software may be referred to only as "the Independent
- * JPEG Group's software".

*

- * We specifically permit and encourage the use of this software as the basis
- * of commercial products, provided that all warranty or liability claims are
- * assumed by the product vendor.

*

- * This file contains a fast, not so accurate integer implementation of the
- * forward DCT (Discrete Cosine Transform).

*

- * A 2-D DCT can be done by 1-D DCT on each row followed by 1-D DCT
- * on each column. Direct algorithms are also available, but they are
- * much more complex and seem not to be any faster when reduced to code.

*

- * This implementation is based on Arai, Agui, and Nakajima's algorithm for
- * scaled DCT. Their original paper (Trans. IEICE E-71(11):1095) is in
- * Japanese, but the algorithm is described in the Pennebaker & Mitchell
- * JPEG textbook (see REFERENCES section in file README). The following code
- * is based directly on figure 4-8 in P&M.

- * While an 8-point DCT cannot be done in less than 11 multiplies, it is
- * possible to arrange the computation so that many of the multiplies are
- * simple scalings of the final outputs. These multiplies can then be
- * folded into the multiplications or divisions by the JPEG quantization
- * table entries. The AA&N method leaves only 5 multiplies and 29 adds
- * to be done in the DCT itself.
- * The primary disadvantage of this method is that with fixed-point math,
- * accuracy is lost due to imprecise representation of the scaled
- * quantization values. The smaller the quantization table entry, the less
- * precise the scaled value, so this implementation does worse with high-
- * quality-setting files than with low-quality ones.
- * /
