

Aadhaar Masking – End User Licence Agreement

This End User Licence Agreement governs HabileLabs’ Aadhaar Masking software when deployed in a customer’s own AWS account through AWS Marketplace. Version 1.1, effective 12 October 2026 (version 1.0 was effective 8 October 2026).

1. Acceptance and parties

This End User Licence Agreement (“EULA”) is between HabileLabs Private Limited (CIN U72900RJ2016PTC055203), a company incorporated in India with its registered office at Plot No. 38, Ganesh Nagar, Kardhani Kalwar Road, Jhotwara, Jaipur, Rajasthan 302012, India (“HabileLabs”), and the entity that subscribes to the Software on AWS Marketplace (“Customer”).

1.1 Customer accepts this EULA when it subscribes to the Software on AWS Marketplace, accepts a private offer that refers to it, or deploys or uses the Software, whichever comes first.

1.2 The person who accepts confirms that they have authority to bind Customer.

1.3 Prices, the subscription term and any usage allowance are those of the AWS Marketplace offer Customer accepted. If Customer and HabileLabs have signed a separate agreement for the Software, that agreement prevails where the two conflict.

1.4 Amazon Web Services is not a party to this EULA. Customer’s use of AWS services is governed by Customer’s own agreement with AWS.

2. Definitions

Term	Meaning
Software	HabileLabs’ Aadhaar Masking software as made available through the AWS Marketplace listing: its container images, the engine and models inside them, deployment templates, and any updates.
Documentation	The usage instructions, architecture description and other guides HabileLabs publishes with the listing.
Subscribed Account	The AWS account that holds the active AWS Marketplace subscription to the Software, and any other AWS account named in Customer’s offer.
Subscription Term	The period during which Customer’s AWS Marketplace subscription to the Software is active.
Customer Data	The documents, images and other data Customer processes with the Software, and the

Term	Meaning
	outputs it produces.
Usage Data	Counts of pages masked by the Software, by day, and the details that identify the deployment that counted them (AWS account, AWS Region, CloudFormation stack name and identifier, Software version, and the AWS Marketplace licence and contract dates and allowance). Usage Data contains no Customer Data.
Authorised Users	Customer's employees and contractors who use the Software for Customer's benefit.

3. Licence grant

3.1 Subject to this EULA and payment of the fees, HabileLabs grants Customer a non-exclusive, non-transferable, non-sublicensable licence, for the Subscription Term, to deploy and run the Software in the Subscribed Account and to let Authorised Users use it.

3.2 Customer may use the Software only to mask Customer Data for Customer's own internal business purposes, including its regulatory obligations to its own customers.

3.3 Customer may deploy the Software only with the deployment templates and methods described in the Documentation. Copies the templates make inside the Subscribed Account, such as a container image placed in a private Amazon ECR repository for AWS Lambda, are part of the licensed deployment and remain subject to this EULA.

3.4 Customer may keep a reasonable number of copies of the Documentation for internal use.

3.5 All rights not expressly granted are reserved by HabileLabs. No licence is granted by implication or estoppel.

4. Restrictions

Customer shall not, and shall not allow anyone else to:

- **(a)** copy, export, save or transfer the Software, its container images or any part of them out of the Subscribed Account, except as clause 3.3 permits;
- **(b)** run the Software in any other AWS account, on premises, on another cloud or on any device, or after the Subscription Term ends;
- **(c)** decompile, disassemble, reverse engineer or otherwise try to derive the source code, rules, models, weights or algorithms of the Software, except to the extent applicable law expressly permits despite this restriction;
- **(d)** extract, copy or reuse the Software's models or weights, or use the Software or its outputs to train, tune or build a product that competes with it;
- **(e)** remove, disable, bypass or interfere with the Software's licence checks, usage counting or notices of ownership (turning usage reporting off under Section 5.3 is permitted);
- **(f)** modify the Software or combine it with other software in a way the Documentation does not describe;

- **(g)** sell, resell, rent, lease, sublicense or distribute the Software, or offer it to third parties as a hosted, managed or bureau service;
- **(h)** use the Software in breach of applicable law, including laws on Aadhaar and personal data.

5. Licence checks and usage reporting

5.1 The Software verifies Customer's entitlement with AWS, through AWS Marketplace and AWS License Manager, when it starts and while it runs. It may stop processing when no valid entitlement is found.

5.2 Customer's offer sets the pages Customer may mask in each contract year. The Software counts the pages it masks and shows the count to Customer. It does not stop masking when the allowance is used up, and neither AWS nor HabileLabs bills usage automatically; additional capacity is bought as additional packs through AWS Marketplace.

5.3 While the deployment template's ShareUsage setting is on, which is the default, the Software sends Usage Data to HabileLabs once a day over an encrypted, authenticated connection. Customer may turn usage reporting off at any time by setting ShareUsage to false; the Software works the same either way. Neither licence checks nor usage reporting send Customer Data to HabileLabs or AWS. HabileLabs uses Usage Data only to administer Customer's subscription, to support Customer and to improve the Software, and also receives subscription information through AWS Marketplace seller reports.

5.4 Customer shall keep the IAM permissions the deployment templates create for licence checks, and shall not block the Software's calls to the AWS Marketplace and AWS License Manager endpoints. If usage reporting is off, Customer shall give HabileLabs its page counts, which the Software shows to Customer, within 30 days of a written request made no more than once a quarter.

6. Records and audit

6.1 During the Subscription Term and for 12 months after it, Customer shall keep records sufficient to show that its use of the Software complies with this EULA, including the AWS accounts where the Software was deployed.

6.2 Within 30 days of HabileLabs' written request, made no more than once in any 12 months, an officer of Customer shall certify in writing that Customer complies with this EULA.

6.3 HabileLabs, or an independent auditor bound by confidentiality, may audit Customer's compliance once in any 12 months. HabileLabs shall give at least 30 days' written notice, and the audit shall take place during business hours.

6.4 An audit shall be limited to deployment records, AWS account configuration and usage records. It shall follow Customer's reasonable security policies and its regulators' requirements. Auditors shall never access Customer Data, Aadhaar numbers or other personal data. The audit may be done remotely.

6.5 If an audit finds use beyond the licence, Customer shall pay for that use at the rates of its offer. If the unpaid amount exceeds 5% of the fees for the period audited, Customer shall also reimburse the reasonable cost of the audit.

6.6 HabileLabs bears its own audit costs in every other case.

7. Customer Data and Aadhaar compliance

7.1 The Software runs entirely in the Subscribed Account. HabileLabs does not receive, access, store or process Customer Data, and has no access to the Subscribed Account. Usage Data under Section 5 is not Customer Data.

7.2 Customer owns Customer Data. Customer decides what is processed, where it is stored and how long it is kept, and secures the Subscribed Account, its storage and its encryption keys.

7.3 Customer remains responsible for its own compliance with the laws that apply to its handling of Aadhaar numbers and personal data. These include the Aadhaar (Targeted Delivery of Financial and Other Subsidies, Benefits and Services) Act, 2016 and its regulations, the Digital Personal Data Protection Act, 2023, and the Reserve Bank of India's Master Direction on Know Your Customer (KYC).

7.4 If Customer asks HabileLabs for support, Customer shall not send Customer Data that contains unmasked Aadhaar numbers. Where a sample is needed, Customer shall send a masked or synthetic one, or the parties shall agree in writing how real data is handled.

8. Ownership, updates and support

8.1 HabileLabs and its licensors own the Software and all intellectual property rights in it, including its code, rules, models, weights, test methods and Documentation, and all updates and derivatives. The Software is licensed, not sold.

8.2 During the Subscription Term, HabileLabs may publish updates to the Software through the listing. Customer is responsible for deploying them. HabileLabs supports the current version and the one before it.

8.3 HabileLabs provides support by email to support@habilelabs.io, during business hours, India Standard Time, as further described in the listing.

8.4 Customer may give HabileLabs suggestions or feedback about the Software. HabileLabs may use them freely, without obligation to Customer, but shall not identify Customer as their source without consent.

9. Confidentiality

9.1 The Software's code, models, internal rules and any non-public Documentation are HabileLabs' confidential information. Audit findings and Customer's non-public business information are Customer's confidential information.

9.2 Each party shall use the other's confidential information only to perform this EULA, protect it with at least reasonable care, and disclose it only to employees, auditors and advisers who need it and are bound by similar duties.

9.3 These duties do not cover information that is or becomes public without fault of the receiving party, was already lawfully known to it, or is independently developed. A party may disclose information when law, a court or a regulator requires, after notifying the other party where lawful.

9.4 These duties survive for 5 years after the Subscription Term ends, and indefinitely for the Software's code, models and rules.

10. Warranty and disclaimer

10.1 For 90 days from first deployment of a version, HabileLabs warrants that the Software will perform substantially as described in the Documentation. Customer's sole remedy for a breach is that HabileLabs will use reasonable efforts to correct it, or, if it cannot, refund the fees paid for the affected period.

10.2 The Software detects and masks Aadhaar numbers and QR codes automatically. It does not guarantee that every Aadhaar number or QR code in every document will be found and masked, or that nothing else will be masked. Detection depends on document quality, layout and orientation.

10.3 Customer shall review outputs in proportion to the risk of its use, as the Documentation describes, and remains responsible for documents it stores or shares.

10.4 Except as stated in this clause, the Software is provided "as is". To the extent law permits, HabileLabs disclaims all other warranties, express or implied, including merchantability, fitness for a particular purpose and non-infringement.

11. Liability and indemnities

11.1 Neither party is liable for indirect, incidental, special or consequential losses, or for loss of profit, revenue, goodwill or data, however caused.

11.2 Each party's total liability under this EULA in any 12 months is limited to the fees Customer paid for the Software in the 12 months before the event giving rise to the claim.

11.3 The limits in 11.1 and 11.2 do not apply to Customer's breach of clause 3 or 4, to either party's breach of clause 9, to the indemnities below, or to liability that law does not allow to be limited.

11.4 HabileLabs shall defend Customer against third-party claims that the Software, used as this EULA permits, infringes an intellectual property right in India, and pay amounts finally awarded or agreed in settlement. HabileLabs may instead modify or replace the Software, obtain the right to keep using it, or end the licence and refund prepaid fees for the unused term. This does not cover claims arising from modification, combination with other software, or use in breach of this EULA.

11.5 Customer shall defend HabileLabs against third-party claims arising from Customer Data, from Customer's breach of clause 4, or from Customer's processing of personal data in breach of law, and pay amounts finally awarded or agreed in settlement.

11.6 The indemnified party shall notify the other promptly, let it control the defence and settlement, and cooperate reasonably at its cost.

12. Term, suspension and termination

12.1 This EULA runs for the Subscription Term, including renewals.

12.2 Either party may terminate this EULA by written notice if the other materially breaches it and does not cure the breach within 30 days of notice. HabileLabs may terminate at once for a breach of clause

4.

12.3 When the Subscription Term ends, the licence ends, and the Software may stop processing. Within 30 days Customer shall delete the Software from every AWS account and system, including copies of its images in private Amazon ECR repositories, and an officer shall certify the deletion in writing on request.

12.4 Customer Data remains Customer's. Ending the licence does not delete it, and Customer can retrieve it from its own storage at any time.

12.5 Clauses 4, 6 (for its stated period), 8.1, 9, 10.4, 11, 12.3 and 13 survive termination.

13. Governing law and general terms

13.1 This EULA is governed by the laws of India.

13.2 Disputes shall be settled by arbitration under the Arbitration and Conciliation Act, 1996, by a sole arbitrator appointed by the parties, seated in Jaipur, in English. Either party may seek urgent interim relief from the courts of Jaipur, which have exclusive jurisdiction for that purpose.

13.3 Customer may not assign this EULA without HabileLabs' written consent, except to a successor of its whole business that takes over the subscription and agrees to this EULA.

13.4 Neither party is liable for delay or failure caused by events beyond its reasonable control, other than payment obligations.

13.5 Notices shall be in writing to the addresses in Customer's AWS Marketplace account and to support@habilelabs.io.

13.6 HabileLabs may revise this EULA for new subscriptions and renewals. A revision does not change a subscription already in force.

13.7 Neither party may use the other's name or logo in publicity without written consent.

13.8 This EULA, with Customer's AWS Marketplace offer, is the entire agreement on its subject. If any provision is unenforceable, the rest remains in force. A failure to enforce a right is not a waiver of it.
